## Junior Frontend Developer

As a Junior Front-End Developer, I excel in collaborative environments, seamlessly working with experienced developers. I thrive in addressing bottlenecks, redirecting workloads, and willingly filling gaps when needed. Eager to contribute creative solutions and enhance technical skills in a dynamic team.

## Skills

Javascript	<div></div>	Typescript	<div></div>
React	<div></div>	HTML	<div></div>
CSS/SASS	<div></div>	Redux Toolkit	<div></div>
Jest	<div></div>	Git	<div></div>

## Professional Studying

### JavaScript Algorithms and Data Structures

FreeCodeCamp • May 2023

### Front End Development Libraries

FreeCodeCamp • June 2023

## React Stage

**The Rolling Scopes School • October 2023 – January 2024**

The project encompassed a range of cutting-edge technologies and methodologies:

- **React Components.**
- **React Routing.**
- **Jest Testing.**
- **React Context API.**
- **Redux Toolkit.**
- **Next.js / SSR / SSG.**
- **React Forms.**
- **GraphiQL Development:** Collaborated with the team in the development of a GraphiQL interface, providing an intuitive way to query and explore GraphQL APIs.

---

## Academic Projects

---

### GraphiQL

**Team Development • Dec, 2023 — Jan, 2024**

Responsibilities:

- Employed Firebase for secure email/password sign-in/sign-up
- Implemented a private route with a Query Editor supporting prettifying
- Lazy-loaded Documentation Explorer for improved performance
- Provided seamless language switching using Context API
- Implemented comprehensive tests with a coverage
- Ensured an adaptive layout for mobile and desktop
